1. The following is an examiner's statement of reasons for allowance:

In regards to claims 1-18, the prior art does not disclose a device for measuring the movement of an object, including: a means for creating time-varying magnetic fields around an object; electrical circuits conforming to the surface of the object; and voltage monitoring means connected to the electrical circuits, whereby motion of the surface creates a measurable change in induced voltage in the circuits that correlates to the movement of the object.

In regards to claims 19-36, the prior art does not disclose a device for measuring the changing area within a portion of a mammal due to cardiac function, including: conductive coil means configured tightly about the various circumferences of at least one portion of the mammal; fixed coil means remotely located relative to the conductive coil means about the mammal; and current generating means for selectively providing alternating current to either one of the conductive coil means or the fixed coil means to create an induced voltage in the other coil means representative of true area within the coil means that is configured tightly about the various circumferences of the mammal portion or portions, with the signals and area changing over time due to the cardiac function of the mammal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
